-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following have no clear antecedent:

"the inner peripheral surface of the resin pump case" of claim 1;

"the driveshaft insert hole" of claim 2;

"the lower annular seal element", "the bottom opening rim of the pump case", "the under-panel", "the upper annular seal element", "the driveshaft insert hole" and "the ejection port of the pump chamber" all of claim 4;
and "the interior surface of the pump" of claim 6.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taguchi in view of Japan 4-321891 and Bloemers et al.

Art Unit: 3617

5. Taguchi discloses the pump case made of resin 16, the sleeve made of metal 17 and the impeller made of elastic material and mounted eccentrically 30.

6. Taguchi does not disclose the plurality of annular seal elements.

7. Japan 891 shows in figure 1 such seal elements and Bloemers et al shows seal element 62.

8. In view of the shown seal elements in figure 1 of Japan 891 and the seal element 62 of Bloemers et al it would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains to provide to Taguchi a plurality of annular seal elements as claimed in the last paragraph of claim 1. Motivation to do so is to prevent coolant from seeping between the case and sleeve.

With regard to claim 5, note that the case in Japan 891 has grooves for the seal elements.

Allowable Subject Matter

9. Claims 2, 3, 4 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
